Subject: Residential, dark sky lighting

I want to thank the city Council for adopting the dark skies resolution. So I was surprised, shocked, and disappointed that we have to wait 10 years for people to replace their lights. I wasn't too clear if the resolution enforces lights that are currently installed that shine beyond the property line. When I walk down the 600 block of Sierra point Road at night with my dog almost every single house has a motion detecting lighting system that even if I'm on the opposite side of the street goes on, blinding me. Perhaps some adjustment could be made to this ordinance or perhaps I'm just not reading it right. A reply would be appreciated. Thank you very much.
