Subject: The big storm

I thought it would be helpful if the city worked with SSF Scavenger to put out dumpsters for green waste after that big storm. I know I lost some larger things that's going to take a great deal of labor to chop up and fit in a can.

The purpose is to clean up and prevent things from going down the storm drains. Being able to clean up quickly after a storm in addition to cleaning before is a good idea.

I'm inclined to think putting about bins after a storm might be more helpful. People use the November weekend to hack up trees that dont really need butchering. While putting bins out after a storm isn't as good prevention, it will stop much of the stuff that came down in the storm from getting into the drains and encourage people to clean up.
