

U.S. 101 ALEMANY PROJECT CONSTRUCTION ALERT

In late April 2020, Caltrans will begin construction to replace the U.S. 101 bridge deck at San Francisco's Alemany Circle.

During construction, northbound 101 traffic will be re-routed onto I-280.

Construction will take place over 4 key phases:

Phase 1:

Northbound Detour

Construction will begin by implementing a northbound detour on U.S. 101 to re-route traffic on to I-280.

Phase 2:

Northbound Demolition and Reconstruction

With the I-280 detour in place and northbound U.S. 101 lanes closed, the northbound deck will be demolished and reconstructed.

Phase 3:

Southbound Demolition and Reconstruction

After the northbound deck is completed, southbound 101 traffic will be shifted onto the new northbound deck. The southbound decks will then be demolished and reconstructed.

Phase 4:

Restoration of U.S. 101 Traffic

With completion of both the northbound and southbound bridge decks, U.S. 101 traffic will be shifted back to its original configuration.

Construction will be 24 hours a day and is expected to be completed in early May.
