Happy Holidays

Tis the last month of 2022, 12 of 12, the final final—December and the Holidays have arrived! Chimney smoke, and a cool bite, fill the air while lights begin to appear, twinkling on homes, trees and boats alike...it's starting to look a lot like Christmas.

Continuing with festivities and cheer, Sierra Point Yacht Club is looking to rock the night away with their Annual Boat Decorating Contest again this year. To enter, all you have to do is put festive lights onboard your boat to get the boat into the judging on Saturday, December 10th. Viewing of the lights will start around 5 pm. Awards will be promptly given afterwards at the Yacht Club. For more details, please see the flyer attached on page 4, or visit SPYC's website at:

<https://spyc.clubexpress.com>. Don't miss out—it's a *Jolly Good Time!*

Dashing to marina business and some general reminders:

- * **Tip:** Staying aboard in colder weather can not only raise the question on how to efficiently keep the boat warm and dry, but also cause condensation beneath the mattress if you end up sleeping aboard. Cold air from the bilge area coming in contact with the boards beneath the mattress (interacting with your body heat), can and will cause moisture issues. A simple technique to combat moisture and mold from occurring is to raise the mattress during the day and crack a portlight for some fresh air. Check the weather forecast before leaving the port open though!
- * **Float Switches:** Can and do go bad regularly. At least once a month, take a moment to locate your bilge pump and test the float switch in auto mode to make sure both the pump and switch are operational.
- * **Vessel Position:** For predominant winds, facing north is best during the spring and summer part of our boating season. For fall and winter months, you may consider turning the vessel around and facing south for a smoother ride through the southerly wind and driving rain events. Many companionway hatches don't fare well with constant weather beating against the hatch boards.
- * **Reminder:** Insurance and registration documents must be kept current at all times while your vessel is within the marina. This also means the updated year sticker must be properly displayed on the hull for those who are State registered vessels.
- * **FYI:** Our Wi-Fi has been on the blink, as some of you may have already known. We are aware of the situation, and parts have been ordered. They should be arriving here soon (hopefully). Once received, we will be looking to get them installed and have you all back up and running in short order (fingers crossed). In the interim, access to the web may be spotty. Thank you for your patience while we get this straightened out.

Until the next go around, please stay warm, dry and safe.

The Marina Team and I wish you all Happy Holidays, from our families to you & yours. Cheers!

Harbormaster Rehberg
